

FINANCIAL MARKET INFRASTRUCTURE

# Partner and advance with modern infrastructure.

End-to-end financial market infrastructure for traditional and decentralized finance. License individual modules or the full stack to power your exchange, marketplace, or financial platform.

Securities Exchange

Private Markets

Digital Assets

9

Modules

Independently licensable

3

Deployment modes

Cloud, on-premise, hybrid

100+

APIs

Full integration suite

24/7

Support

Enterprise SLA

# Nine modules, one stack.

Each module is independently licensable and works seamlessly with the others — start with one, add more as your market grows.

01 CORE

## Securities Exchange

Powers public equity markets end-to-end, from listing to CSD. Real-time order matching, surveillance, and retail and institutional configurations.

- ✓ Order matching
- ✓ CSD integration
- ✓ Surveillance
- ✓ Retail & institutional

02 MARKETS

## Private Markets & Trading

Institutional-grade and peer-to-peer private market transactions for equity, bonds, T-bills, commercial papers, and notes.

- ✓ P2P trading
- ✓ OTC desk
- ✓ Deal rooms
- ✓ Investor qualification

03 ADVANCED

## Derivatives

Futures, swaps, and structured products on FX, equities, crypto, and commodities. Smart contract automation for lifecycle management.

- ✓ Futures
- ✓ Swaps
- ✓ Options
- ✓ Smart contracts

04 CUSTODY

## Depository & Custodian

Multi-signature and MPC custody supporting digital, tokenized, and traditional assets, with integrated audit tools.

- ✓ Multi-sig
- ✓ MPC custody
- ✓ Audit trail
- ✓ Asset safekeeping

05 SETTLEMENT

## Clearing & Settlement

Cross-asset clearing and atomic settlement through distributed ledger consensus. Fast finality and reduced counterparty risk.

- ✓ T+1 settlement
- ✓ DLT consensus
- ✓ Risk netting
- ✓ Reconciliation

06 INTELLIGENCE

## Intelligence Infrastructure

Decision intelligence systems with expert networks and AI integrations, applied to strategy, forecasting, and organizational governance.

- ✓ Expert networks
- ✓ Decision systems
- ✓ Forecasting
- ✓ Governance

07 DIGITAL

## Digital Asset Exchange

End-to-end digital exchanges for cryptocurrencies and tokenized assets. Wallet management, matching engine, and API trading.

- ✓ Crypto exchange
- ✓ Tokenization
- ✓ Wallet management
- ✓ API trading

08 PAYMENTS

## Stablecoin

A complete framework for fiat or asset-backed stablecoins. Smart contract mint and burn, reserve transparency, and compliance controls.

- ✓ Mint / burn
- ✓ Reserve proof
- ✓ Compliance
- ✓ Multi-collateral

09 DEFI

## Lending, Staking & IEO

Lending desks, staking pools, and compliant token launches with investor onboarding and vesting schedules.

- ✓ Lending pools
- ✓ Staking
- ✓ Token launch
- ✓ Vesting

## DEPLOYMENT

# Deploy your way.

Choose the deployment model that matches your security, compliance, and scale requirements.

MOST POPULAR

### Cloud Hosted

Fully managed SaaS deployment on our global infrastructure. Zero maintenance, continuous updates.

- ✓ Auto-scaling
- ✓ 99.99% uptime
- ✓ Global CDN

ENTERPRISE

### On-Premise

Deploy on your own infrastructure, with complete control and customization for enterprise needs.

- ✓ Full data control
- ✓ Custom configuration
- ✓ Your security perimeter

FLEXIBLE

### Hybrid

Combine cloud and on-premise. Keep sensitive data local while using our global network.

- ✓ Data stays local
- ✓ Cloud elasticity
- ✓ Mixed workloads

## LICENSING OPTIONS

# Flexible licensing for every scale.

From a single module to the full stack. Every license is priced to scope — talk to us for a proposal.

01

### Single Module

License an individual module for a specific use case. Ideal for adding capabilities to an existing platform.

- ✓ 1 module
- ✓ Dedicated support
- ✓ Any deployment

PRICING

Custom

02

POPULAR

### Multi-Module Bundle

Bundle 3–5 modules at a discounted rate. Popular with exchanges launching multiple market types.

- ✓ 3–5 modules
- ✓ Dedicated support
- ✓ Any deployment

PRICING

Custom

03

### Full Stack License

The complete nine-module infrastructure stack. Build a full-service exchange from the ground up.

- ✓ All 9 modules
- ✓ Dedicated support
- ✓ Any deployment
